Mobile App Test Case Document

Prepared by: Sai Sangeetha Padakanti | Date: 05/11/2026 | Version: 1.0

1. Project Overview

Item	Details
Application Under Test	Amazon
App Version	32.18.0.300
Platform	Android
Testing Type	Manual, Functional, UI/Usability, Compatibility
Tester	Sai Sangeetha Padakanti
Testing Period	02/11/2026 to 05/11/2026

2. Scope

In scope: Login, Search, Cart, Checkout, Usability, Compatibility.

Out of scope: Performance testing, security testing, real payment transactions.

3. Test Environment

Item	Details
Device Model	POCO M4 5G
Android Version	14 UP1A.231005.007
Network	Mobile data
Screen Size	6.58 inch(16.71 cm)

4. Test Approach

- Manual black-box testing on a real Android device.
- Test cases written from the user's point of view, covering valid inputs, invalid inputs, and edge cases.
- Each test case marked Pass or Fail by comparing the Actual Result with the Expected Result.
- Defects found are logged in Section 6 with steps, severity, and priority.

5. Test Cases

TC ID	Module	Scenario	Steps	Expected Result	Actual Result	Status
TC01	Login	Valid mobile number and correct OTP	1. Open app 2. Enter valid number 3. Enter correct OTP	User logs in and reaches home screen	User successfully logged in and navigated to the home screen.	Pass
TC02	Login	Wrong OTP	1. Enter valid number 2. Enter wrong OTP	Clear error message, login not allowed	Appropriate error message displayed for incorrect OTP. Login was unsuccessful.	Pass
TC03	Login	Empty mobile number	1. Leave number blank 2. Tap Continue	Validation message shown	Validation message displayed when the mobile number field was left empty.	Pass
TC04	Login	Invalid number (less than 10 digits)	1. Enter 5 digits 2. Tap Continue	Error shown, no OTP sent	Error message displayed for an invalid mobile number. OTP was not sent.	Pass
TC05	Search	Search a valid item	1. Tap search 2. Type a valid item name	Relevant results displayed	Relevant search results displayed for the entered item name.	Pass

TC06	Search	Gibberish or special characters	1. Type @#$%^ in search	No results message, app does not crash	Irrelevant search results are shown. App remained stable.	Fail

TC ID	Module	Scenario	Steps	Expected Result	Actual Result	Status
TC07	Search	Empty search	1. Tap search 2. Submit with no text	No crash, suggestions or message shown	App handled empty search input without crashing.	Pass
TC08	Cart	Add item to cart	1. Open an item 2. Tap Add	Item appears in cart, count updates	Selected item was successfully added to the cart, and cart count was updated.	Pass
TC09	Cart	Increase and decrease quantity	1. In cart tap + then -	Quantity and total price update correctly	Item quantity and total price updated correctly when + and - buttons were tapped.	Pass
TC10	Cart	Remove all items	1. Remove every item from cart	Empty cart screen shown	All items were removed successfully, and the empty cart screen was displayed.	Pass

TC11	Checkout	Invalid coupon code	1. Go to checkout 2. Apply invalid coupon	Error message, price unchanged	Appropriate error message displayed for an invalid coupon. Total price remained unchanged.	Pass
TC12	Checkout	Back button during checkout	1. Open checkout 2. Press phone back button	Returns to cart, items intact	User returned to the cart page, and all cart items were retained.	Pass
TC13	Usability	Rotate screen on cart page	1. Open cart 2. Rotate phone	Layout and data stay intact	Cart layout and item details	Pass
TC ID	**Module**	**Scenario**	**Steps**	**Expected Result**	**Actual Result**	**Status**
					remained intact after screen rotation.	
TC14	Compatibility	Internet off while browsing	1. Browse items 2. Turn off internet	Friendly offline or retry message, no crash	Appropriate offline or retry message was displayed when the internet connection was disconnected.	Pass
TC15	Compatibility	Incoming call during use	1. Use app 2. Receive a call 3. Return to app	App resumes on same screen	App resumed successfully on the same screen after the incoming call ended.	Pass

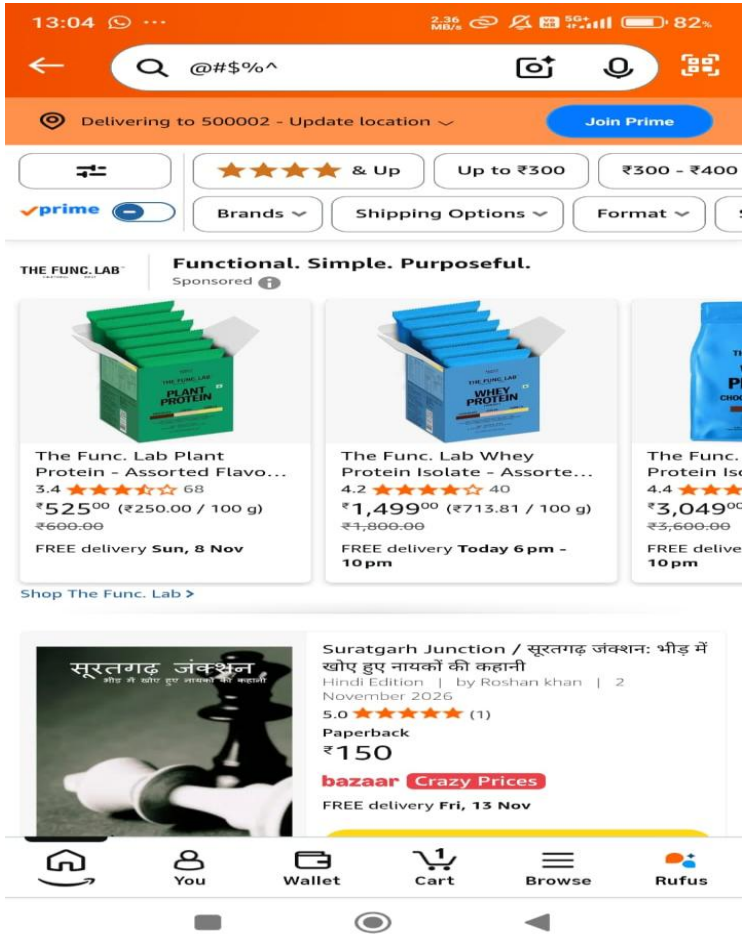

6. Defect Reports

Defects Identified: 1

Item	Details
Bug ID	BUG-001
Title	Irrelevant search results displayed for special character input
Related Test Case	TC06
Steps to Reproduce	1. Open Amazon app. 2. Tap Search. 3. Enter @#$%^. 4. Submit the search.
Expected Result	The app should display a No Results message.
Actual Result	Irrelevant search results were displayed instead of a No Results message.
Severity	Low
Priority	Low
Environment	POCO M4 5G, Android 14, Amazon App 32.18.0.300
Screenshot	TC06_Search_Bug.png

Item	Details
Status	New

7. Test Summary

Metric	Count
Total Test Cases	15
Passed	14
Failed	1
Defects Logged	1

Observations:

The Amazon mobile application performed as expected in most of the tested scenarios. Login, cart, checkout, and other tested functionalities worked as expected. However, an issue was identified in the search module, where irrelevant results were displayed for special-character input.

8. Quick Reference

1. Severity vs. Priority

- **Severity:** Describes how seriously a defect affects the application's functionality.
- **Priority:** Determines how urgently a defect needs to be fixed. **2. Smoke Testing**

A type of testing performed to verify that the major functionalities of an application are working properly before proceeding with detailed testing.

3. Sanity Testing

A type of testing performed after minor changes or bug fixes to ensure that the specific functionality is working as expected.

4. Regression Testing

Testing performed after code changes or bug fixes to ensure that existing functionalities are not affected by the new changes.

5. Defect Life Cycle

The sequence of stages a defect goes through from identification to closure.

Stages:

If the issue still exists after retesting, the defect is marked as **Reopened**.

6. Test Case

A document containing preconditions, test steps, test data, expected results, and actual results used to verify a particular functionality.

7. Test Scenario

A high-level description of a functionality or feature that needs to be tested.

8. Actual Result

The actual outcome observed after executing the test steps.

9. Expected Result

The outcome that should occur according to the application's requirements.

10. Pass/Fail Criteria

- **Pass:** Actual result matches the expected result.
- **Fail:** Actual result does not match the expected result.
- **Blocked:** Testing cannot proceed due to an external issue.
- **Not Executed:** The test case has not yet been performed.
